Lab#7 Create dashboard with accordion using Bootstrap. Each accordion contains different bootstrap components.

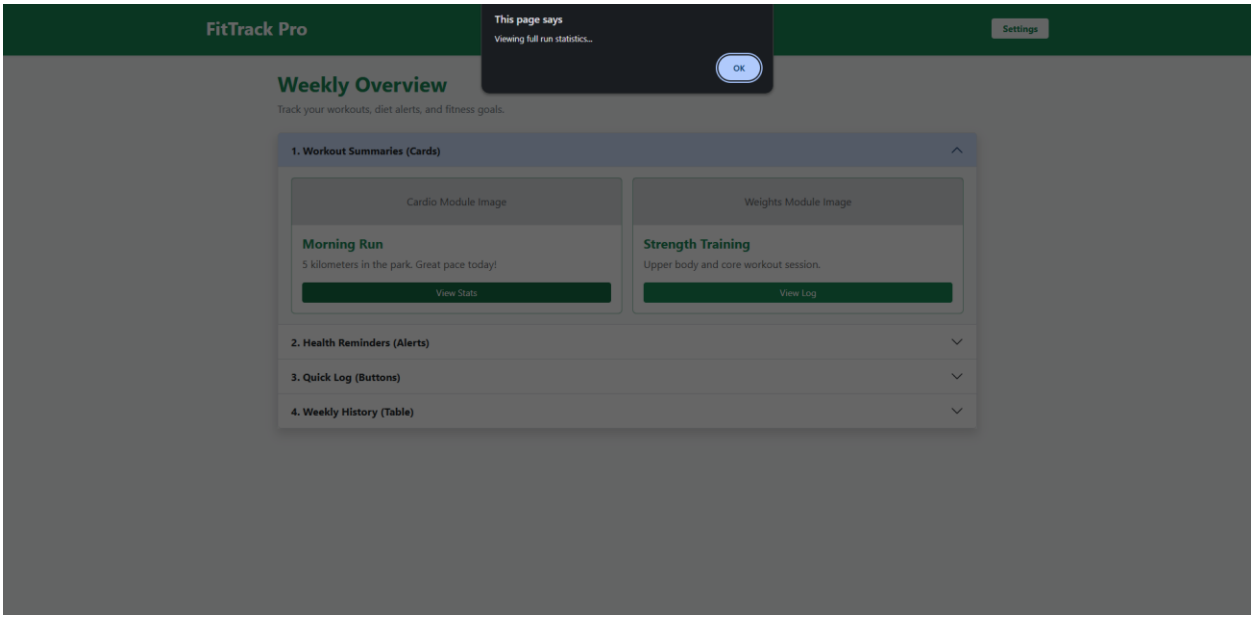

TAGS USED	ATTRIBUTES USED	DESCRIPTION
<HTML>	lang	Defines the root element of the document. In the code, the lang="en" attribute is used to specify that the document is in English.
<HEAD>	--	Contains metadata such as the character set (<meta charset="UTF-8">) and viewport settings for the webpage
<TITLE>	--	Sets the webpage title shown in the browser tab. The code sets this to "Student Reg Form".
<BODY>	BGCOLOR, TEXT, BACKGROUND	Contains all the visible content of the web page. The listed attributes historically set the background color, text color, and background image, though modern development handles this via CSS.
<H1>,<H2>,<H3>, <H4>,<H5>,<H6>	ALIGN	Defines section headings, ranging from <H1> (most important) to <H6> (least important). The ALIGN attribute historically positioned the text (left, right, center).
<FONT>	FACE, SIZE, COLOR	An older, deprecated tag used to visually style text by changing its font family
<P> (Paragraph)	--	Defines a distinct block of text or paragraph.
<U> (Underline)	--	Renders the enclosed text with a solid underline, typically to denote a stylistic difference or annotation.

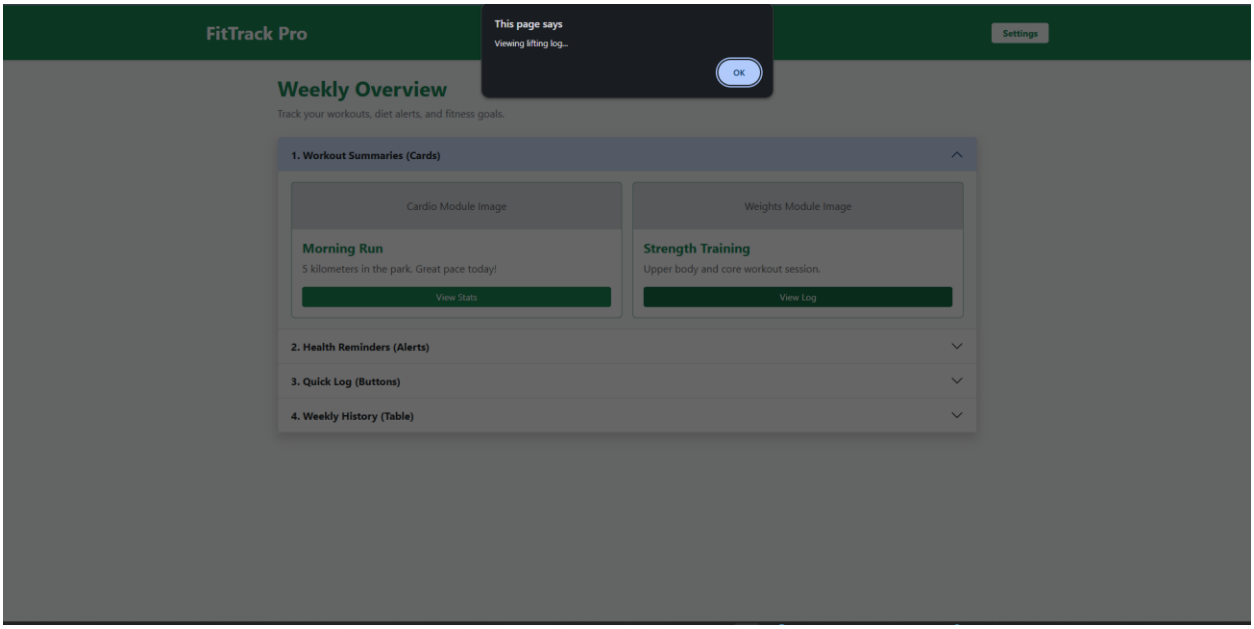

<HR> (Horizontal Rules)	--	Creates a horizontal dividing line to thematically separate content on the page. The attributes adjust its width, color, and horizontal alignment.
  (Break Line)	--	Inserts a single line break, pushing subsequent content to the next line without creating a new paragraph block.

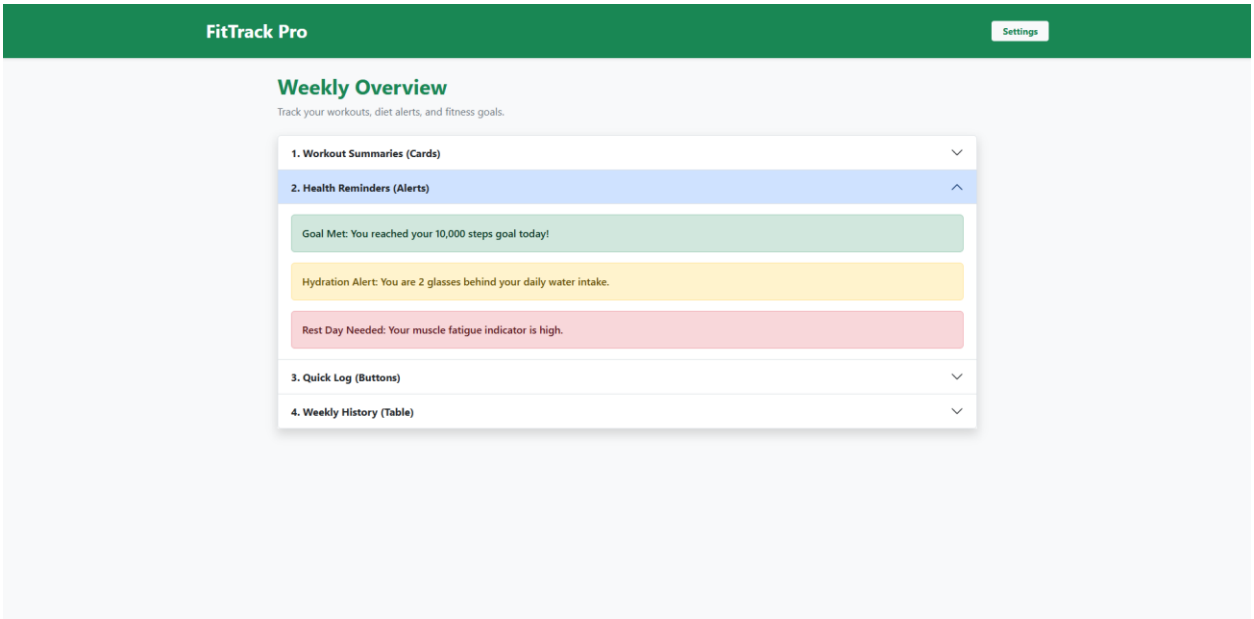

Final Outcome:

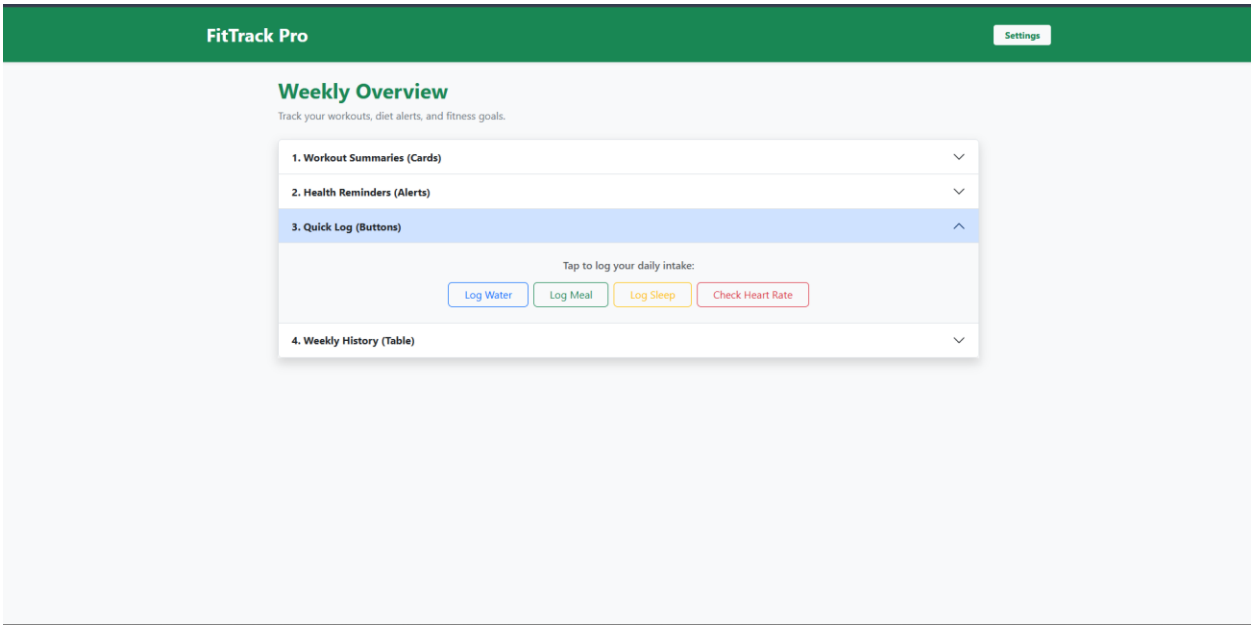

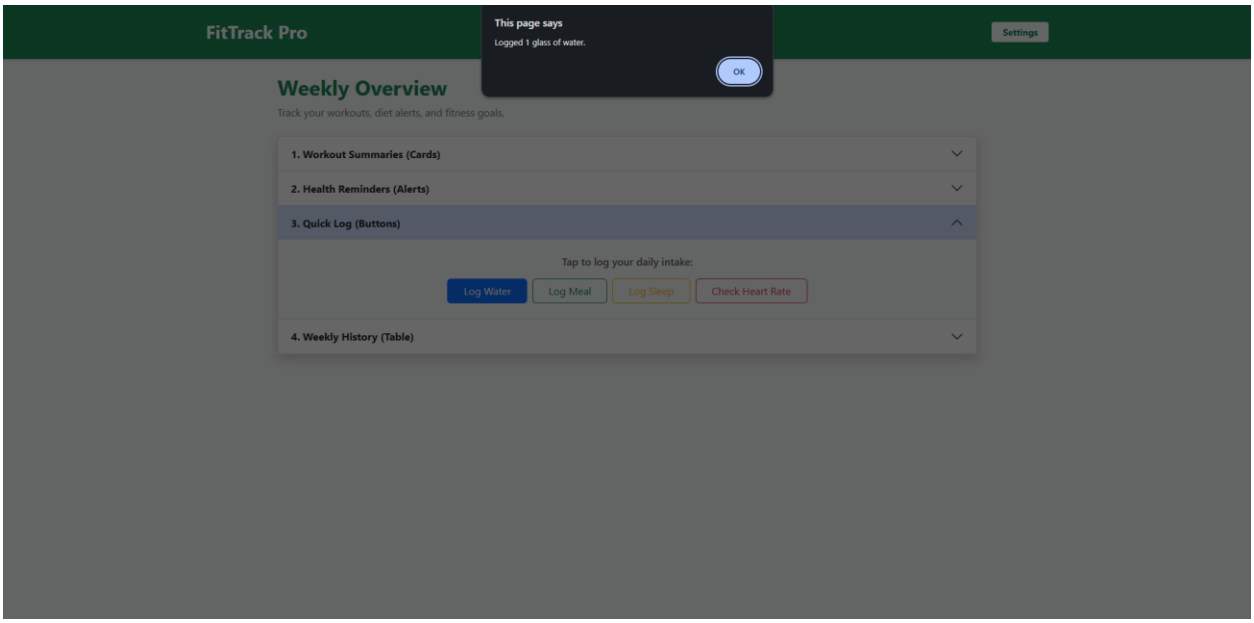

FitTrack Pro
Settings
Weekly Overview
Track your workouts, diet alerts, and fitness goals.
